TECHNICAL NOTES

Introduction

Food & Beverages Services refer to business activities related to food & beverages serving activities providing complete meals or drinks fit for immediate consumption, whether traditional, self-service or take-away restaurants. Food & Beverages Services is one of the important sectors that contributes to Brunei Darussalam's economy, accounting for nearly 11 per cent of the number of enterprises; employing around 9 per cent of the workforce; and generating about 2 per cent of the total operating revenue of the private sector in 2017.

The Food & Beverages Services Index (F&BSI) measures the movements of food & beverages services activities. It serves as a leading economic indicator of the food & beverages services performance as well as consumer spending behavior.

Scope and coverage

The Food & Beverages Services activities are classified accordance with the 'Brunei Darussalam Standard Industrial Classification (BDSIC) 2011' which is based on the United Nation's 'International Standard Industrial Classification (ISIC), revision 4'.

Group	Business Group Description
56	FOOD AND BEVERAGE SERVICES ACTIVITIES
561	Restaurants and mobile food services activities
562	Event catering and other food services activities
563	Beverage serving activities

Data Sources

F&BSI is compiled using data from the Quarterly Survey of Businesses (QSB) conducted by the Department of Economic Planning and Statistics (JPES) every quarter. A sample of 97 enterprises are covered in the QSB for retail trade activities.

The weight for each activity reflects its relative importance in the overall food and beverage services sector. The weights are computed based on the food and beverage services of each activity obtained from the Annual Census of Enterprises (ACE) for reference year 2017.

Index Compilation

The overall F&BSI is a weighted average of indices at the detailed activity level. The sales index at the activity level is derived by aggregating the sales value of enterprises belonging to the same activity and dividing it by the average quarterly sales for the same activity in the base year (2017). The overall F&BSI is then computed by summing all the weighted activities indices using the Laspeyres formula.

The indices are based on sales values at current prices. Hence the changes in the value indices may be due to changes in both price and quantity. The indices are also not seasonally adjusted.

Revision Policy

Revisions will only be made to the published figures for the previous periods if there are any changes based on the latest available data.
