INTERNATIONAL MERCHANDISE TRADE STATISTICS

JULY 2026

BND Million

INTERNATIONAL MERCHANDISE TRADE STATISTICS (IMTS) JULY 2026

Highlights

Year-on-Year Change

Total trade for July 2026 was BND2,772.5 million, comprising exports of BND1,613.3 million and imports of BND1,159.2 million. This reflected a year-on-year increase of 46.2 per cent from BND1,896.7 million in July 2025.

Meanwhile, the trade balance decreased by 21.3 per cent to BND454.1 million (July 2026) from BND576.7 million in July 2025.

Month-on-Month Change

On a month-on-month basis, total trade increased by 9.3 per cent, increasing from BND2,537.4 million in June 2026 to BND2,772.5 million in June 2026.

Merchandise Exports

Exports by Commodity Section

On a year-on-year basis, the merchandise exports increased by 30.5 per cent to BND1,613.3 million in July 2026 from BND1,236.7 million in July 2025. Mineral Fuels accounted for the highest share of total exports at 83.2 per cent (BND1,342.2 million), followed by Chemicals at 14.7 per cent (BND237.2 million) and Machinery and Transport Equipment at 0.7 per cent (BND11.2 million).

On a month-on-month basis, the merchandise exports also increased by 2.1 per cent from BND1,580.0 million in June 2026 to BND1,613.3 million in July 2026.

Main Exports

On a year-on-year basis, main exports increased by 30.5 per cent in July 2026, primarily driven by a 42.9 per cent increase in Mineral Fuels while exports of Chemicals decreased by 12.5 per cent.

The increase in Mineral Fuels exports was mainly attributed to a 61.5 per cent rise in Other Petroleum Products exports, from BND370.7 million in July 2025 to BND598.7 million in July 2026. Exports of LNG also increased by 34.7 per cent, while exports of Crude Oil and Other Gas Products rose by 28.6 per cent and 15.2 per cent, respectively.

On the hand, the exports of Chemicals decreased by 12.5 per cent, led by a 6.0 per cent reduction in Chemicals and Related Products from BND251.5 million to BND236.4 million. Meanwhile, there was no exports of Methanol in July 2026.

On a month-on-month basis, main exports recorded a rise of 4.9 per cent in July 2026. This was mainly driven by a 9.4 per cent increase in exports of Mineral Fuels, despite a 15.0 per cent decrease in exports of Mineral Fuels.

Exports by Trading Partners

The highest share of exports in July 2026 went to Australia with a share of 37.4 per cent, followed by Singapore (14.6 per cent) and People's Republic of China (12.5 per cent).

Chart 2: Share of Exports by Trading Partners

Merchandise Imports

Imports by Commodity Section

In July 2026, merchandise imports increased by 75.6 per cent to BND1,159.2 million compared to BND660.0 million in July 2025. Mineral Fuels recorded the highest share of total imports at 73.5 per cent (BND852.4 million) followed by Machinery and Transport Equipment (6.7 per cent or BND77.8 million) and Food (6.3 percent or BND73.5 million).

Meanwhile, on a month-on-month basis, total imports recorded a rise of 21.1 per cent, mainly contributed to the increases in the imports value of Manufactured Goods; Mineral Fuels; Chemicals; and Beverages and Tobacco.

Imports by Trading Partners

Malaysia accounted for the largest share of imports in July 2026, at 70.0 per cent, followed by People's Republic of China at 6.6 per cent and Nigeria at 5.2 per cent.

Chart 3: Share of Imports by Trading Partners

Imports by End-Use Categories

In July 2026, the import of Intermediate Goods was valued at BND665.4 million, accounting for 57.4 per cent of total imports. This was followed by Capital Goods (BND462.4 million or 39.9 per cent of total imports) and Consumption Goods (BND31.4 million or 2.7 per cent of total imports).

Main Mode of Transport

The main mode of transport for Brunei Darussalam's international merchandise trading is sea transport, followed by air and land.

In July 2026, the total value of goods transported by sea for both exports and imports were BND2,665.7 million. The relative share of sea transport accounted for 99.0 per cent of exports and 92.1 per cent of imports. Goods transported by air contributed about 0.9 per cent of goods exports and 5.2 per cent of goods imports, while cross-border trading via land recorded 0.1 per cent of exported goods and 2.7 per cent of imported goods.

Table 6: Exports and Imports by Mode of Transport

TECHNICAL NOTES

1. Introduction

The International Merchandise Trade Statistics (IMTS) are compiled on a monthly basis based on the imports and exports data submitted by the Royal Customs and Excise Department, Ministry of Finance through customs declarations, and the Department of Energy, Prime Minister's Office. The general system of recording IMTS adopted by Brunei Darussalam covers imports, domestic exports and re-exports that have been cleared through customs.

2. Coverage of Merchandise

All goods imported into or exported from Brunei Darussalam are included in the IMTS.

The following classes of goods are excluded:

- currency notes and coins in circulation;
- personal and household effects which do not incur any Brunei Darussalam customs duty and which are taken by passengers for their own use;
- stores and fuel supplied to Brunei ships and aircraft;
- articles on loan or rent, for example, equipment for oil surveys and experimental drilling, etc.;
- goods in transit;
- fish and other marine products landed from Brunei Darussalam fishing vessels direct from fishing grounds;
- goods imported and exported by or on behalf of diplomatic services; and
- goods imported by the armed forces.

3. Time of Recording

Brunei Darussalam uses the 'release date' as its time of recording, which provides the time/date that stipulated in source documents when goods enter or leave the economic territory.

4. Valuation

Imports are valued at CIF, that is, the value of goods at the frontier of the exporting trading partners plus the cost of insurance and freight and any other charges when sold for export to Brunei Darussalam. Custom duties are not included in the value of imports.

Exports are valued at FOB, that is, the value of goods to be purchased abroad up to the point where the goods are deposited on board the outgoing vessel, aircraft and/or vehicle. Goods on consignment are valued at the current import price for imports and the current export price for exports.

Goods are recorded at their market value. Values are reported in millions of Brunei dollars. Data reported in foreign currencies are converted into local currency at the prevailing market exchange rate on the date of permit clearance.

5. Commodity Classification

Commodity items reported are classified in accordance with the Brunei Darussalam Trade Classification and Customs Duties 2022. This classification incorporates the ASEAN Harmonized Tariff Nomenclature (AHTN), which is based on the 8-digits Harmonised Commodity Description and Coding System Nomenclature (H.S) developed by the World Customs Organisation (WCO).

For International comparability in this report, import and export are classified according to the United Nations Standard Trade Classification, Revision 4 (SITC Rev. 4).

The imports data can also be categorized according to their end-use categories, namely Capital, Intermediate or Consumption based on Brunei Darussalam's Broad Economic Categories (BDBEC), which is adapted from United Nation, the Fifth revision of Broad Economic Categories.

The BDBEC is classified in accordance with Broad Economic Category introduced by the United Nations and as a means for converting data compiled in terms of SITC into end-use categories.

The BDBEC provides categories which can be aligned into 3 classes of goods in the System of National Accounts (SNA):

- Capital Goods are used as a means of producing other goods or services.
- Intermediate Goods are semi-processed, semi-manufactured and industrial-supplies; and transformed or used up in the production of goods and services.
- Consumption Goods are final product mainly used by households for final consumption.

6. Mode of transport

Merchandise trade in goods by mode of transport are compiled according to the means of transport used when goods enter or leave the economic territory of the economy. The following classifications are the main categories of the mode of transport:

1. Air;
2. Sea;
3. Land; and
4. Others include postal consignments, mail or courier shipments and goods crossing the border not to attribute a transaction to any specific mode of transport categories.

The method of transport used for the carriage of goods is recorded as the mode of transport such as aircraft, vehicle, vessel and other type of transport of goods. The mode of transport for imports refers to the last mode of transport by which the cargo was transported to the port of clearance into the economy whereas, for exports the mode of transport information records the last mode of transport with which cargo crossed the customs border on its exit from the economy.
