HIGHLIGHTS

- In **Quarter 2 (Q2) 2026,** total trade in services was valued at BND849.5 million, representing an increase of 39.5 per cent from BND608.9 million in Q2 2025.

- Exports of services declined by 22.6 per cent, from BND148.0 million in Q2 2025 to BND114.6 million in Q2 2026.

- Imports of services increased by 59.4 per cent, from BND460.9 million in Q2 2025 to BND734.9 million in Q2 2026.

Chart 1: **Exports and Imports of Trade in Services**

- Consequently, the trade in services deficit widened to BND620.3 million in Q2 2026, from BND312.9 million in Q2 2025, reflecting lower exports and higher imports of services.

Notes: Trade Balance = Exports of Services - Imports of Services
Total Trade = Exports of Services + Imports of Services
Figure may not tally due to rounding

- In the **first half (H1) of 2026,** total trade in services increased by 23.5 per cent year-on-year to BND1,546.8 million, driven by a 34.0 per cent increase in imports, while exports declined by 12.7 per cent. Consequently, the trade in services deficit widened by 53.1 per cent to BND1,054.8 million.

EXPORTS IN SERVICES BY MAJOR COMPONENTS

YEAR-ON-YEAR CHANGE

In Q2 2026, exports of services declined by 22.6 per cent year-on-year, from BND148.0 million in Q2 2025 to BND114.6 million. The decline was mainly attributed to lower exports of Transport and Travel services, which decreased by 33.9 per cent and 22.1 per cent, respectively.

The decline in Transport services was mainly attributed to lower exports of air transport and other freight-related services in Brunei Darussalam. Meanwhile, the decrease in Travel services was mainly attributed to lower number of foreign travellers to Brunei Darussalam.

Transport services remained the largest component of exports of services, valued at BND48.3 million and accounting for 42.1 per cent of total exports in Q2 2026. This was followed by Travel services at BND44.5 million (38.8 per cent) and Other Business Services BND8.3 million (7.3 percent).

Chart 2: **Main Exports of Trade in Services**

QUARTER-ON-QUARTER CHANGE

On a quarter-on-quarter basis, exports of services decreased by 12.8 per cent, from BND131.4 million in Q1 2026 to BND114.6 million in Q2 2026. The decrease was mainly attributed to Transport and Travel services.

Transport services declined by 11.2 per cent, from BND54.4 million in Q1 2026 to BND48.3 million in Q2 2026, while Travel services decreased by 20.3 per cent, from BND55.8 million to BND44.5 million over the same period. These declines were greater than the increases recorded in other components, including Financial services and Other Business Services, which grew by 66.7 per cent and 6.4 per cent, respectively.

IMPORTS IN SERVICES BY MAJOR COMPONENTS

YEAR-ON-YEAR CHANGE

In Q2 2026, imports of services increased by 59.4 per cent year-on-year, from BND460.9 million in Q2 2025 to BND734.9 million. The increase was mainly driven by Other Business Services from BND123.8 million to BND381.7 million, representing an increase of 208.3 per cent.

Apart from Other Business Services, increases were also recorded in Transport services, which rose by 36.8 per cent from BND73.1 million to BND100.0 million, and Maintenance and Repair services, which increased by 38.5 per cent from BND19.5 million to BND27.0 million. These increases were partly offset by a 10.2 per cent decline in Travel services, from BND166.3 million in Q2 2025 to BND149.3 million in Q2 2026.

Other Business Services was the largest component of imports of services in Q2 2026, accounting for 51.9 per cent of total imports. This was followed by Travel services at BND149.3 million (20.3 per cent) and Transport services at BND100.0 million (13.6 per cent).

Chart 3: Main Imports of Trade in Services

QUARTER-ON-QUARTER CHANGE

On a quarter-on-quarter basis, imports of services increased by 29.9 per cent, from BND565.9 million in Q1 2026 to BND734.9 million in Q2 2026. The increase was mainly driven by Other Business Services, which rose by 76.7 per cent, from BND216.0 million to BND381.7 million.

Other increases were recorded in Transport services, which grew by 16.0 per cent from BND86.2 million to BND100.0 million, and Maintenance and Repair services, which increased by 25.6 per cent from BND21.5 million to BND27.0 million. In contrast, Travel services declined by 17.4 per cent, from BND180.7 million in Q1 2026 to BND149.3 million in Q2 2026, partially offsetting the overall increase in imports of services.

EXPORTS AND IMPORTS IN SERVICES BY TRADING PARTNERS

The exports and imports of services by trading partner presented in this report exclude Transport, Travel, and Government goods and services n.i.e., as the available source data do not provide a breakdown by trading partner for these service components. Consequently, the totals presented in this section differ from the overall exports and imports of services.

EXPORTS OF SERVICES

In Q2 2026, Malaysia was the main trading partner for exports of services, with exports valued at BND4.7 million, accounting for approximately 73.4 per cent of the total shown in the trading-partner table. This was followed by Singapore at BND0.3 million and Saudi Arabia at BND0.3 million.

Overall, ASEAN countries accounted for BND5.2 million, representing approximately 81.3 per cent of the total, indicating that exports were predominantly concentrated within the ASEAN region.

Malaysia
BND4.7 million

Singapore
BND0.3 million

Saudi Arabia
BND0.3 Million

IMPORTS OF SERVICES

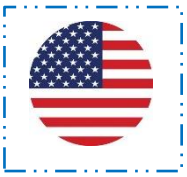

For imports of services, Malaysia was also the largest trading partner in Q2 2026, with imports valued at BND294.6 million, representing approximately 67.2 per cent of the total shown in the trading-partner table. This was followed by Singapore at BND41.5 million (9.5 per cent) and the United States of America at BND27.6 million (6.3 per cent).

BND27.6 million

TRADE IN SERVICES: PERIOD-ON-PERIOD CHANGES

During the first half (H1) of 2026, Brunei Darussalam's total trade in services increased by 23.5 per cent year-on-year, from BND1,252.8 million in H1 2025 to BND1,546.8 million in H1 2026.

The increase was mainly driven by higher imports of services, which rose by 34.0 per cent from BND970.9 million to BND1,300.8 million. In contrast, exports of services declined by 12.7 per cent, from BND281.8 million in H1 2025 to BND246.0 million in H1 2026.

As the increase in imports coincided with a decline in exports, the trade in services deficit widened from BND689.1 million in H1 2025 to BND1,054.8 million in H1 2026, representing an increase of 53.1 per cent in the deficit. This indicates that the expansion in total trade in services during H1 2026 was predominantly attributable to increased demand for imported services rather than growth in services exports.

Table 4: Exports and Imports in Services

	BND Million		Change (%)
	H1 2025	H1 2026	H1 2026 / H1 2025
Exports of Services	281.8	246.0	-12.7
Imports of Services	970.9	1,300.8	34.0
Trade Balance	-689.1	-1,054.8	53.1
Total Trade	1,252.8	1,546.8	23.5

Technical Notes

1. Introduction

Statistics on International Trade in Services (SITS) are generally compiled in accordance with the United Nations' recommendations, as outlined in the Manual on Statistics of International Trade in Services 2010 (MSITS 2010) and the 6th edition of the IMF Balance of Payments Manual (BPM6).

2. Data Sources

The main sources of SITS data are based on;

- **Survey on International Trade in Services**

  The survey on International Trade in Services is the primary source of data for exports and imports of services and encompasses enterprises involved in international trade in services between Brunei Darussalam residents and non-residents.

  The survey is conducted under the authority of the Statistics Act, Chapter 81 of the Laws of Brunei Darussalam. All information provided will be treated as confidential and used solely for statistical purposes. Partner country data is also used to estimate service transactions and for comparison purposes.

- **Administrative Sources**

  Administrative data is collected from government agencies and private agencies for the compilation of international trade in services under government transactions, travel, transport, and communication.

3. Concept of Resident and Non-Resident

A resident is defined as any individual, enterprise or other organization ordinarily domiciled in Brunei Darussalam. Brunei Darussalam branches and subsidiaries of non-resident companies are considered residents of Brunei Darussalam.

On the other hand, a non-resident is any individual, enterprise or other organization ordinarily domiciled in a country other than Brunei Darussalam. Similarly, foreign branches and subsidiaries of Brunei Darussalam companies who are residing temporarily in Brunei Darussalam are considered as non-residents.

There are exceptions to these definitions. Individuals and members of their immediate families who reside outside Brunei Darussalam but work with the Brunei Government, such as diplomats, consular officials, and members of the armed forces, are considered Brunei residents. Brunei students studying at foreign educational institutions are also considered as Brunei residents, regardless of the duration of their study abroad.

Conversely, individuals and members of their immediate families working in Brunei Darussalam for foreign embassies, consulates or other missions as well as foreign students enrolled at Brunei Darussalam's educational institutions are not considered as Brunei Darussalam residents, regardless of their length of stay.

4. Classifications

The international trade in services are compiled in accordance to the MSITS and BPM6 standard services major components, which consist of 12 headings, as follows:

1. Manufacturing services on physical inputs owned by others

Manufacturing services on physical inputs owned by others include activities such as processing, assembly, labelling and packing that are undertaken by enterprises that do not own the goods. Examples include oil refining, liquefaction of natural gas and assembly of clothing and electronics. Exclusions from this category are the assembly of prefabricated construction (included in construction) and labelling and packing incidental to transport (included in transport services).

The manufacturing is undertaken by an entity that does not own the goods and is paid a fee by the owner. The ownership of the goods does not change, so no general merchandise transaction is recorded between the processor and the owner. Only the fee charged by the processor is included under this item, although such a fee may include the cost of materials purchased by the processor.

2. Maintenance and repair services not included elsewhere (n.i.e.)

Maintenance and repair services n.i.e. include maintenance and repair work by residents on goods owned by non-residents (and vice versa). The repairs may be performed at the site of the repairer or elsewhere. Maintenance and repairs on ships, aircraft and other transport equipment are included in this item. Cleaning of transport equipment is included in transport services. Construction repairs and maintenance are included under construction. Maintenance and repairs of computers are included under computer services.

The value recorded for maintenance and repairs is the value of the repair work done, not the gross value of the goods before and after repairs. The value of maintenance and repairs encompasses any parts or materials supplied by the repairer and included in the price (parts and materials charged separately are excluded from services and included in general merchandise). Both minor repairs that maintain the item in working order and major repairs that extend the efficiency or capacity of the good or extend its life are included. No distinction is made between those repairs included by the customer in intermediate consumption and those included in capital formation.

3. Transport

Transport covers the carriage of people and objects from one location to another, along with related supporting and auxiliary services, as well as rentals (charters) of carriers with crew. Postal and courier services are also included. Transport can be classified based on the mode of transport and the items carried (passengers or freight).

4. Travel

Travel includes goods and services acquired by individuals undertaking study or medical care outside the territory of residence. It also includes acquisitions of goods and services by seasonal, border and other short-term workers in the economy of employment.

Travel excludes the acquisition of goods and services by diplomats, consular staff, military personnel, etc., and their dependents in the territory in which they are posted (these are included in Government goods and services n.i.e.).

5. **Construction**

   Construction covers the creation, management, renovation, repair or extension of fixed assets in the form of buildings, land improvements of an engineering nature and other constructions such as roads, bridges and dams. It also includes related installation and assembly work, site preparation and general construction as well as specialised services such as painting, plumbing and demolition.

6. **Insurance services**

   Insurance services cover the provision to non-residents of various types of insurance by resident insurance enterprises, and vice versa. Insurance and pension services be disaggregated into direct insurance; reinsurance and auxiliary insurance.

   Direct insurance is further broken down into life insurance, freight insurance and other forms of direct insurance. Insurance provides financial protection to individual units (such as governments, enterprises and households) exposed to certain risks, covering the consequences of the occurrence of specified events. In addition, insurers frequently act as financial intermediaries, investing funds collected from these units in financial or other assets in order to meet future claims.

7. **Financial services**

   Financial services cover financial intermediation and auxiliary services, excluding those provided by insurance enterprises and pension schemes. These services include those usually offered by banks and other financial intermediaries and auxiliaries. Included are services related to transactions in financial instruments, as well as other services associated with financial activity. These services include, inter alia, deposit taking and lending, letters of credit, credit card services, commissions and charges related to financial leasing, factoring, underwriting and clearing of payments. Also included are financial advisory services, custody of financial assets or bullion, financial asset management, monitoring services, convenience services, liquidity provision services, risk assumption services other than insurance, merger and acquisition services, credit rating services, stock exchange services and trust services.

8. **Charges for the use of intellectual property not included elsewhere (n.i.e.)**

   Charges for the use of intellectual property n.i.e. include:

   - Charges for the use of proprietary rights, such as patents, trademarks, copyrights, industrial processes and designs, trade secrets, and franchises, where rights arise from research and development, as well as from marketing.

   - Charges for licences to reproduce and/or distribute intellectual property embodied in produced originals or prototypes, such as copyrights on books and manuscripts, computer software, cinematographic works and sound recordings, and related rights, such as for the recording of live performances and for television, cable or satellite broadcast.

9. Telecommunications, computer and information services

Telecommunications services covers the broadcast or transmission of sound, images, data, or other information via telephone, telex, telegram, radio and television cable transmission, radio and television satellite, electronic mail, facsimile, etc. This category includes business network services, teleconferencing and support services. It excludes the value of the information transported. Also included are mobile telecommunications services, Internet backbone services and online access services, including the provision of access to the Internet. Exclusions from this category are installation services for telephone network equipment (included in construction), and database services (included in information services).

Computer services consist of hardware and software related services and data processing services. These include sales of customized and non-customized software, installation and consultancy services.

Information services include news agencies services, database services (database conception, storage, and dissemination), and direct non-bulk subscriptions to newspapers and periodicals, whether by mail, electronic transmission or other means.

10. Other business services

Other business services comprised of three sub-components: research and development services, professional and management consulting services and technical, trade-related and other business services.

- Research and development services covers those services associated with basic research, applied research and experimental development of new products and processes. This includes activities in the physical sciences, the social sciences and the humanities.

- Professional and management consulting services are divided into two parts:

    i. Legal, accounting, management consulting, and public relations services and advertising, market research and public opinion polling; and

    ii. Services for the general management of a branch, subsidiary, or associate provided by the parent enterprise or other affiliated enterprise.

- Technical, trade-related and other business services is broken down into five sub-components: architectural, engineering, scientific and other technical services; waste treatment and de-pollution, agricultural and mining services; operating leasing services; trade-related services; and other business services n.i.e. Architectural, engineering, scientific and other technical services is broken down into three components:

    i. Architectural services, which includes transactions related to the design of buildings;

ii. Engineering services, which includes the design, development and utilization of machines, materials, instruments, structures, processes and systems. Services of this type involve the provision of designs, plans and studies related to engineering projects. Mining engineering is excluded and included instead in services incidental to mining, and oil and gas extraction; and

iii. Scientific and other technical services, which include surveying; cartography; product testing and certification; and technical inspection services.

11. Personal, cultural and recreational services

Personal, cultural, and recreational services comprise of two sub-components: audio-visual and related services and other personal, cultural, and recreational services.

12. Government goods and services not included elsewhere (n.i.e.)

Government goods and services n.i.e. cover:

- Goods and services supplied by and to enclaves, such as embassies and military bases.
- Goods and services acquired from the host economy by diplomats, consular staff and military personnel located abroad and their dependants.
- Services supplied by and to Governments and not included in other categories of service.

5. International Trade in Services by Trading Partner

The international trade in services by partner country are collected via surveys conducted by the Department of Statistics of the Department of Economic Planning and Statistics, Ministry of Economy, Trade and Industry. The record is based on the country of residence of the non-resident transactor and the value of the transactions vis-à-vis each country. The compilation of trading partners data does not include transport, travel and government services.
